TIRANA

ANNOUNCEMENT OF ACADEMIC POSITION

Job Type: Lecturer in the Department of Computer Engineering

Metropolitan Tirana University invites Albanian/Foreigner Academic Staff

Academic Discipline : Algorithms,
Artificial Intelligence and Intelligent
Systems

Contract Type: Full time

Contract start: September 2021

Application deadline: 30.08.2021

Metropolitan Tirana University is a MESY certified university consisting of three faculties, Civil Engineering and Architecture, Faculty of Economics and Faculty of Computer Science and IT. The total number of students at MTU is around 1000, a number which has increased significantly in the last two years.

Classified as one of the best universities in Albania, special importance has recently been given to the creation of an enterprise ecosystem, pedagogical innovation and structuring of scientific activities around doctoral schools in collaboration with institutions and colleagues from Europe and the USA. . Particular importance has been given to the internationalization of pedagogical activities through a series of agreements with European universities and Erasmus projects in support of student mobility. Also, special importance is being given to the agreements signing with European and domestic enterprises to support pedagogical and scientific activity as well as the employment of MTU students.

**The Faculty of Computer Science and IT
at Metropolitan Tirana University recruits a lecturer
(Metropolitan Tirana University invites Albanian/Foreigner Academic Staff)**

Metropolitan Tirana University recruits a research lecturer in the field of Artificial Intelligence and Mathematics at the Faculty of Computer Science and IT (FCSIT).

Having earned a Doctorate and the necessary pedagogical experience enables you to be involved in the short term in the various pedagogical programs of this faculty at the Bsc or Msc level.

Your scientific potential is concretized with scientific publications in scientific conferences and journals indexed and with impact factor as well as in your participation in scientific and development projects.

You will be part of the Informatics Department of FCSIT in charge of informatics study programs, software engineering as well as the localized master of ESIEE Paris at UMT which is a project that will become possible in September 2022. In terms of teaching, you will strengthen the pedagogical team of the department and will participate in bachelor and master study programs mainly in the field of algorithms and programming. You will also participate in leading student projects with an application dimension as well as master's degree degrees. Your interest in pedagogical innovation is an added value for you and for MTU.

In terms of scientific research, your work and experience attest to the potential and capacity you have for dialogue and scientific exchange in some areas of MTU activity. You have a real interest in industrial applications and technology transfer and have a research project that converges with that of the ALF focused on Artificial Intelligence and Intelligent Systems.

You also have the capacity to undertake pedagogical and research actions in collaboration with colleagues and international institutions. For the above position, knowledge of English is necessary for both teaching and scientific research reasons.

Applicants are invited to submit their application and upload the following documents **in Albanian/English**, in PDF form:

1. Cover Letter
2. Curriculum Vitae /List of publications and references in scientific national/international conferences
3. Copies of Degree certificates (evaluation marks list of Bachelor and Master degree)as well as earned Doctorate documents or other academic titles, or certificate of attendance of the third cycle of "Doctorate" studies.

For diplomas obtained in foreign universities, a notarized photocopy of the certificate of recognition by the competent body (MESY) or a copy of a certificate that is in the process of recognition, must be submitted.

Applicants are invited to submit their application by e-mail to:
