OPEN CALL FOR PAID INTERNSHIP AT IRIS SOFTWARE GROUP

The Opportunity

The IRIS Americas engineering team is working on an exciting project to combine two of their products into a new cloud offering for global accounting firms.

They have an opportunity for 5 graduates to join them to assist with development and test automation. This may involve building or enhancing modules, or writing automated test cases to cover existing functionality.

The successful candidates will work as part of their existing development teams.

What they can offer **you:**

Experience of working in mature agile development teams on commercial software in a real-world environment. You'll get to build or test real code and make a genuine difference to a key project.

We will provide cloud-based development environments for you, and you will be assigned both a team leader and a mentor to work with.

You will be working as part of IRIS Software Group, a leading global business for accountancy, HR and education with locations in the UK, US, Canada, Romania, Bulgaria, and India. As a business, we have big plans for expansion, so this is an excellent opportunity to introduce yourselves to a growing firm!

What are they looking **for:**

You should be enthusiastic, keen to learn, and with a background in software development in any major framework through formal learning and your own projects. You will be happy to work in a team, with an eye for detail and quality.

Their tech stack:

- ASP.NET MVC 6 / C#
- SQL Server
- Selenium / SpecFlow
- Azure DevOps
- Docker / Kubernetes
- Visual Studio / Code

Timeline of the paid internship

3rd of July, 2023- 3rd of October, 2023

Documents to apply

- Updated CV
- Motivational Letter

Deadline for applications 25th of June, 2023.
